## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 52-57 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Again, claim 52 contains the phrase "at least 0.5 g per hectoliter" and specificational basis for the phrase could not be found. While applicants refer to the specification for support, that disclosure only provides antecedent basis for up to 30 and not above, as the claim language indicates.

Claims 52-57 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The process whereby the pectin is extracted from hops is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The Bekkers Declaration discloses that the Hoelle process does not provide an extract anywhere near the amount claimed, even though it is the aim of Hoelle to extract all of the pectin. Therefore, it is critical to the instant invention to utilize the instantly disclosed process for extracting and purifying.

Art Unit: 1761

***Allowable Subject Matter***

Claims 52-57 are allowable over the prior art because Hoelle fails to teach the use of the claimed amount of hop pectin (see Bekkers Declaration) nor is there any motivation for Hoelle to purify the pectin. Further, Bukovskii fails to teach adding a pectin extract during the claimed time period, i.e., "after commencement of wort boiling and not earlier than 30 minutes before the end of wort boiling."

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
